

Sinabox

Let's have a look inside →

Stay Offline Stay in Control.

Experience the convenience and security of our products entirely offline
– with all data securely stored on your premises.

Sinaccluster

Sinabis Analytics Inspector

Sinabis LLM (Sinabis Assistant)

Our powerful system is designed to support seamless offline use
of our products, featuring:

256GB M.2 SSD for lightning-fast booting

2x 2TB RAID storage for enhanced reliability and capacity

GeForce RTX 4060 with 16GB VRAM for exceptional performance

64GB RAM to handle demanding tasks effortlessly

Built to deliver an unparalleled offline experience,
optimized for our products.

Our Automated Data Processing Service

SINACLUSTER

Effortlessly upload forensic containers like ad1, create cases, and let our system automatically process and convert data into seamless, analyzable formats for streamlined investigations.

Ekolite Upload Wizard

Upload Evidence
Step by step

Evidence Name

emails.eml

Description

Ekolite Maildump

Files selector
Allowed compressed file format: .zip, .e01, .ad1

Click to upload or drag and drop

Say goodbye to the delays of sending your data to us for processing. With the SINACLUSTER Dashboard, you can now upload evidence directly, speeding up the process and putting you in control.

SINACLUSTER processes the data securely on the Sinabox, and you can explore the results in detail using the Inspector. The dashboard also provides a clear breakdown of analyzed messages and files for faster insights.

Hi Lisa,

Just a quick reminder to submit all outstanding employee expenses through our XMS system before the closing of the NokaGrid transaction

This ensures that all expense reports are handled efficiently. Payments for pre-closing expenses will be deposited into the designated accounts following the transaction

Let me know if you have any questions or need assistance.

Regards, Tom Riley

Effortlessly search through

Millions

—yes, millions

—of emails (Chats, Audios, Files..) with lightning-fast speed.

Sinabis Analytics Inspector

The screenshot displays the Sinabis Analytics Inspector interface. On the left is a dark sidebar with navigation icons. The main area is divided into a 'Search History' panel on the left and a detailed email view on the right. The 'Search History' panel shows a list of search results with columns for sender, recipient, date, and subject. The detailed view on the right shows the full text of a selected email, including headers, body text, and attachments. The interface includes various filters and search options at the top, such as 'Full text', 'not', 'exact', and 'Search...'. The bottom of the interface shows a pagination bar with the number of results (111,898 of 111,898) and a 'demo' label.

Tags

Create your own Tags and tag all your data for easy access and organization.

The screenshot shows a 'Tags' modal window in the Sinabis Analytics Inspector. The modal has a title bar with a close button. Below the title bar is a 'New Tag' button. The main area of the modal is a table with columns: Name, Shortcut, Info, Save Tag, Export, Edit, and Delete. The table contains three rows of tags: 'personal' (shortcut 'p'), 'important', and 'not relevant'. A dropdown menu is open next to the 'personal' tag, showing options to 'Export', 'Tag', and 'Date descending'. The modal is overlaid on a blurred background of the main application interface.

SINABIS LLM

Our large language model (LLM) offers advanced text understanding, summarization, and context-based insights to assist with complex tasks efficiently.

Ask Sinabis Assistant

Ask me →

The Sinabis Assistant may contain errors in the creation of results or recommendations. Therefore, important information should be carefully checked to ensure an accurate and reliable response.

Document Scanning

Effortlessly upload your documents, and let the Sinabis Assistant analyze and extract key information, enabling you to ask questions and gain insights instantly.

Ask the Sinabis Assistant

You can also leverage the Sinabis Assistant without uploading documents. Engage with it just like any other LLM/GPT – ask questions, explore ideas, and access a wealth of knowledge tailored to your needs.
